Importance of Sleep

- Sleep disorders have been linked with a wide range of health consequences

39% Of Americans Can't Sleep

Share of respondents who suffered from sleep disorders in the last twelve months*

* Problems falling asleep or staying asleep, among others.
2,000-10,000 respondents (18-64 y/o) surveyed per country from Jan.-Dec. 2022.

Sleep is essential for proper functioning of human body

Importance of Sleep Posture

Importance of Sleep Posture

- We have our favorite sleep postures

Importance of Sleep Posture

Your sleep posture can be fatal

- We have our favorite sleep postures

Importance of Sleep Posture

Your sleep posture can be fatal

- We have our favorite sleep postures

- **Supine posture** exacerbates sleep apnea
- Sleeping on left side eases heartburn
- Side sleeping aids in digestion

Sleep posture is correlated with many health conditions

Importance of Sleep Posture

Sleep Posture
Monitoring

Sleep posture monitoring is essential for long-term good health

Importance of Sleep Posture

- Sleep posture as an indicator of Parkinson's progression

**Sleep Posture
Monitoring**

Sleep posture monitoring is essential for long-term good health

Importance of Sleep Posture

- Sleep posture as an indicator of Parkinson's progression

Sleep Posture Monitoring

- Sleep posture monitoring is required post-surgery

Sleep posture monitoring is essential for long-term good health

Importance of Sleep Posture

- Sleep posture as an indicator of Parkinson's progression

Sleep Posture Monitoring

- Sleep posture monitoring is required post-surgery

- Sleep posture monitoring is required to adopt to new posture

Sleep posture monitoring is essential for long-term good health

Importance of Sleep Posture

- Sleep posture as an indicator of Parkinson's progression

Sleep Posture Monitoring

- Sleep posture monitoring is required post-surgery

- Sleep posture monitoring is required to adopt to new posture

- Sleep posture monitoring to provide insight into sleep quality

Sleep posture monitoring is essential for long-term good health

Monitoring

Argosleep captures accurate sleep posture without invading privacy

Our Proposal: Argosleep

- Human sleeps in front of the mmWave device

Our Proposal: Argosleep

- Human sleeps in front of the mmWave device
- Combines Reflection from Multiple Antennas

Our Proposal: Argosleep

- Human sleeps in front of the mmWave device
- Combines Reflection from Multiple Antennas

Rest State

- Machine Learning

Sleep Posture Predictor

Our Proposal: Argosleep

- Human sleeps in front of the mmWave device
- Combines Reflection from Multiple Antennas

- Turn is detected based on cross-correlation

- State Machine switches between states

Toss-Turn Detector

Our Proposal: Argosleep

- Human sleeps in front of the mmWave device
- Combines Reflection from Multiple Antennas

Rest State

Toss-Turn State

- Machine Learning

Sleep Posture Predictor

- Turn is detected based on cross-correlation

- State Machine switches between states

Toss-Turn Detector

Challenges

Challenges

- Specularity and Weak Reflectivity

Most of the signals transmitted do not reach back to the mmWave receiver

mmWave signals are highly specular

Challenges

- Specularity and Weak Reflectivity

Most of the signals transmitted do not reach back to the mmWave receiver

mmWave signals are highly specular

- Low Imaging Resolution

(a) Rest in left lateral posture (b) Rest in supine posture

Imperceptible images with many missing parts

Limited antenna array size

Our Proposal: Argosleep

- Human sleeps in front of the mmWave device
- Combines Reflection from Multiple Antennas

Rest State

Toss-Turn State

- Machine Learning

Sleep Posture Predictor

- Turn is detected based on cross-correlation

- State Machine switches between states

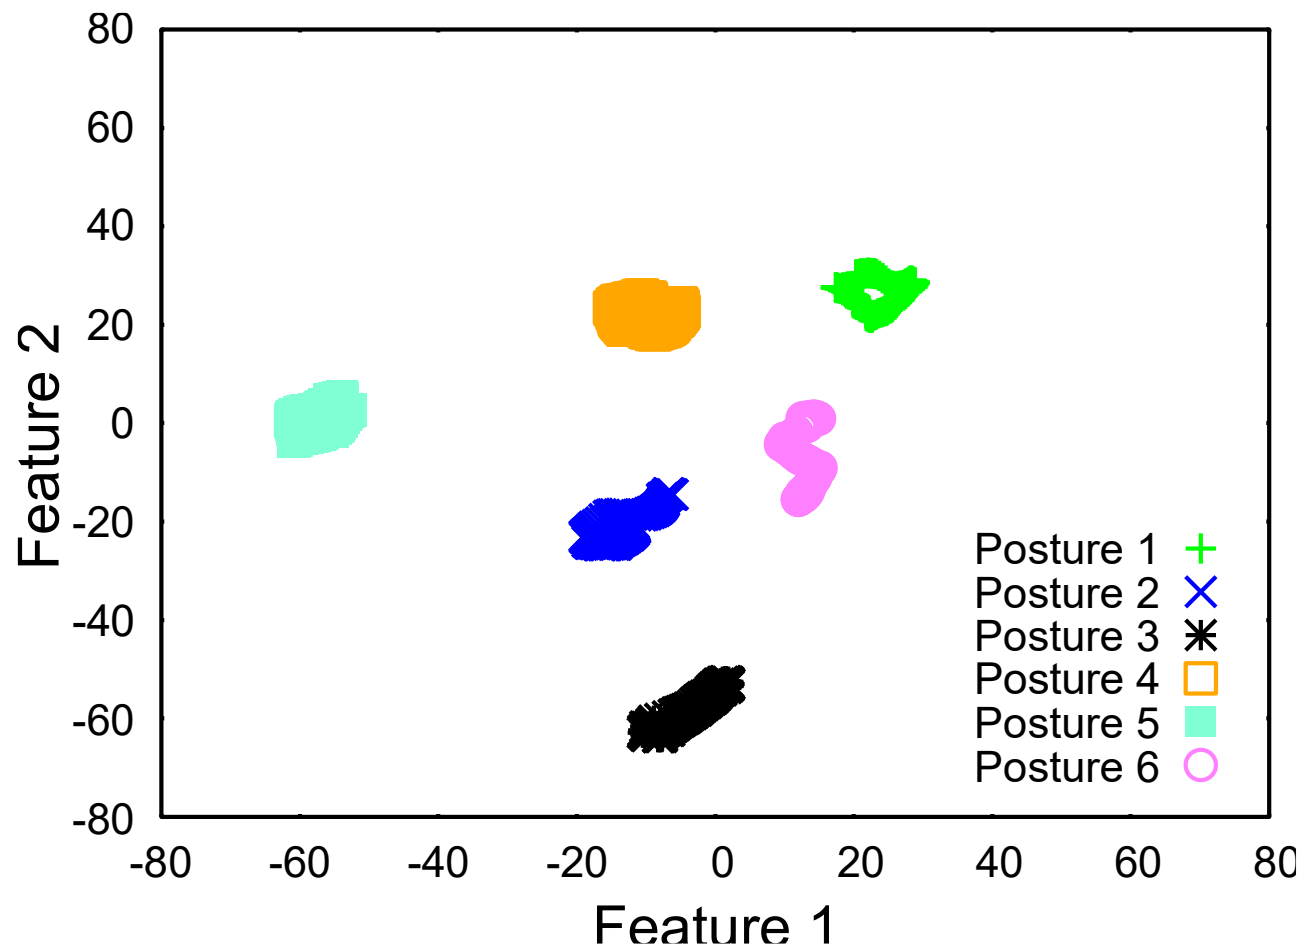

Toss-Turn Detector

Sleep Posture Predictor: Key Ideas

Reflected signals carry distinct signatures about sleep postures in feature space

Sleep Posture Predictor: Key Ideas

Reflected signals carry distinct signatures about sleep postures in feature space

We can use learning model to infer joint locations

Sleep Posture Predictor: Key Ideas

Reflected signals carry distinct signatures about sleep postures in feature space

We can use learning model to infer joint locations

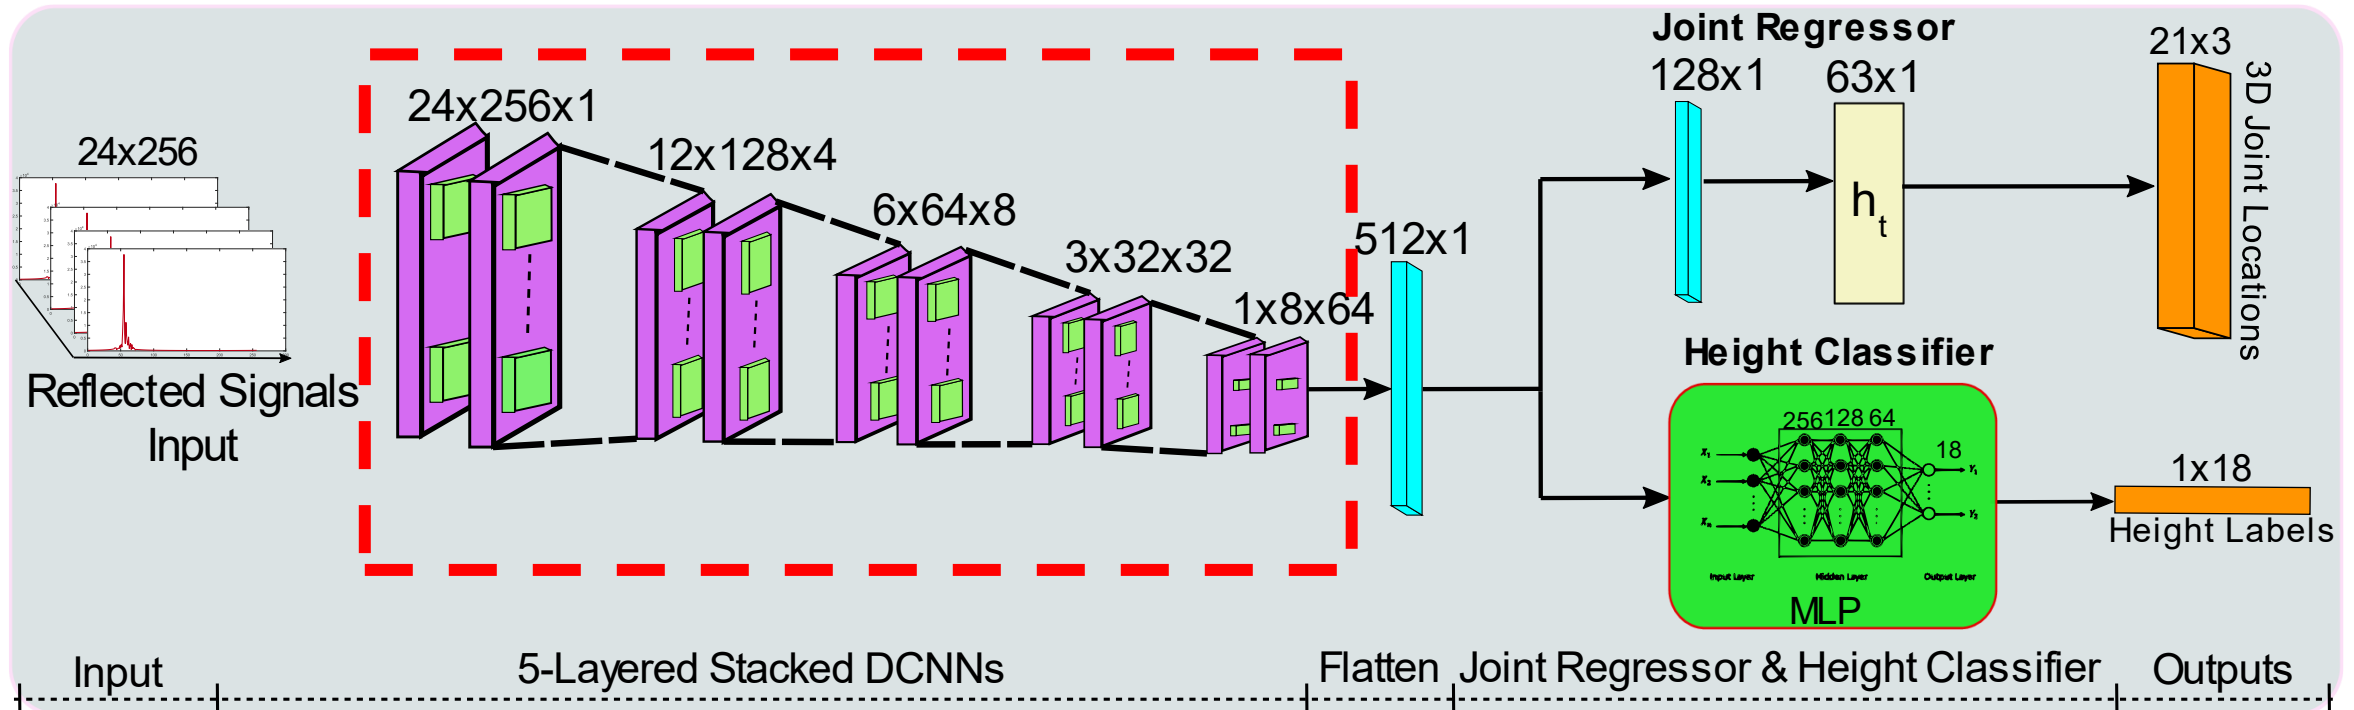

Challenge: How to learn location of joints for different individuals?

Rest Network

Rest Network predicts location of joints using reflected signals

Rest Network

Convolutional layers extracts the relevant features

Rest Network

Most of human body joints follow parent-child hierarchy

Rest Network

3D location of body joints of an individual is correlated to height

Our Proposal: Argosleep

- Human sleeps in front of the mmWave device
- Combines Reflection from Multiple Antennas

Rest State

Toss-Turn State

Machine Learning

Sleep Posture Predictor

- Turn is detected based on cross-correlation

- State Machine switches between states

Toss-Turn Detector

Toss-Turn Detector: Key Ideas

Human sleeps for a longer duration and takes toss-turn for shorter duration

We can detect toss-turn as high frequency event

Toss-Turn Detector: Key Ideas

Human sleeps for a longer duration and takes toss-turn for shorter duration

We can detect toss-turn as high frequency event

Challenge: Toss-turn changes are weaker and do not appear sharp

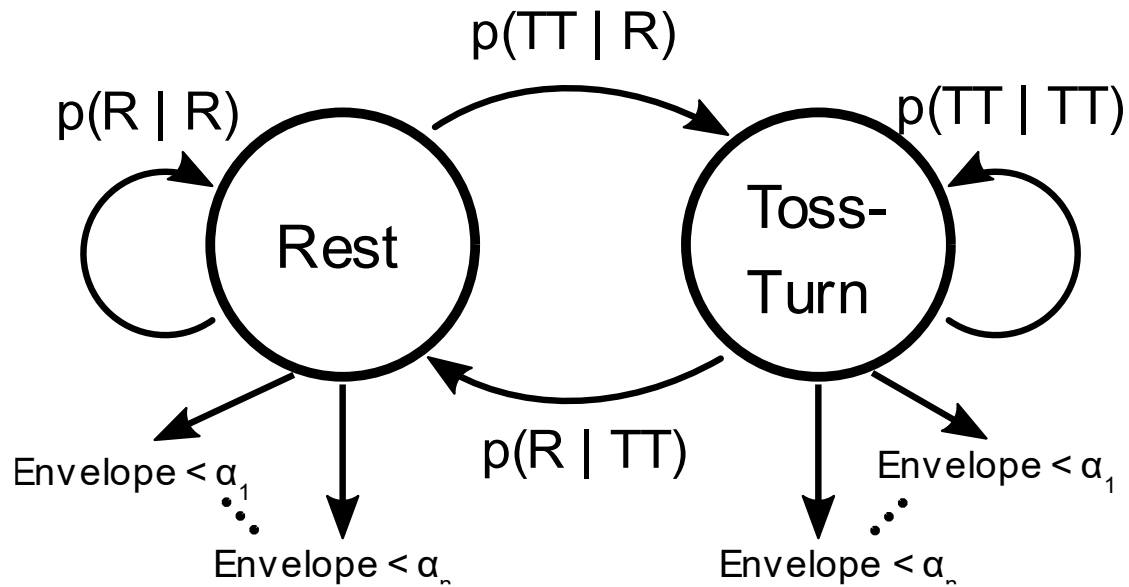

Cross-Correlation based Toss-Turn Detection

- Rest states show nearly zero rate of change in correlation, while toss-turn states show variable changes

State Machine

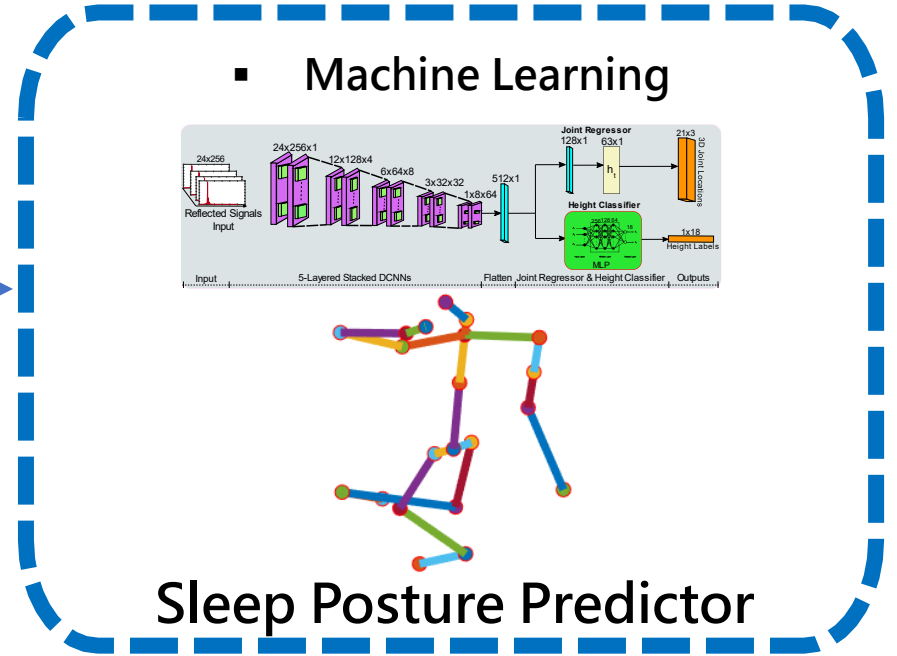

- Improves toss-turn detection accuracy
- Provides switching between rest state and toss-turn state

State Machine switches states using two-state Hidden Markov Model

Argosleep Summary

- Human sleeps in front of the mmWave device
- Combines Reflection from Multiple Antennas

- Turn is detected based on cross-correlation

- State Machine switches between states

Toss-Turn Detector

Implementation

mmWave Hardware: 77–81 GHz mmWave transceivers, BW 1.62 GHz
TI IWR1443BOOST (Each with one transmit and four receive antennas)

Ground Truth: Microsoft Kinect Xbox One

Data Collection

- Subject is asked to sleep at approximately 2.5 m distance from the setup
- Dataset includes input-output pairs of mmWave reflections and 3D joint locations
- **Sleep Posture Predictor Data Collection**
 - We collect datasets from 8 volunteers with 5 diverse poses
 - Each experiment takes 60 seconds to complete
- **Toss-Turn Detector Collection**
 - We collect data from a single volunteer with multiple toss-turns
 - Each experiment takes 60 seconds to complete

In total, 40 K input-output pairs from 8 diverse volunteers

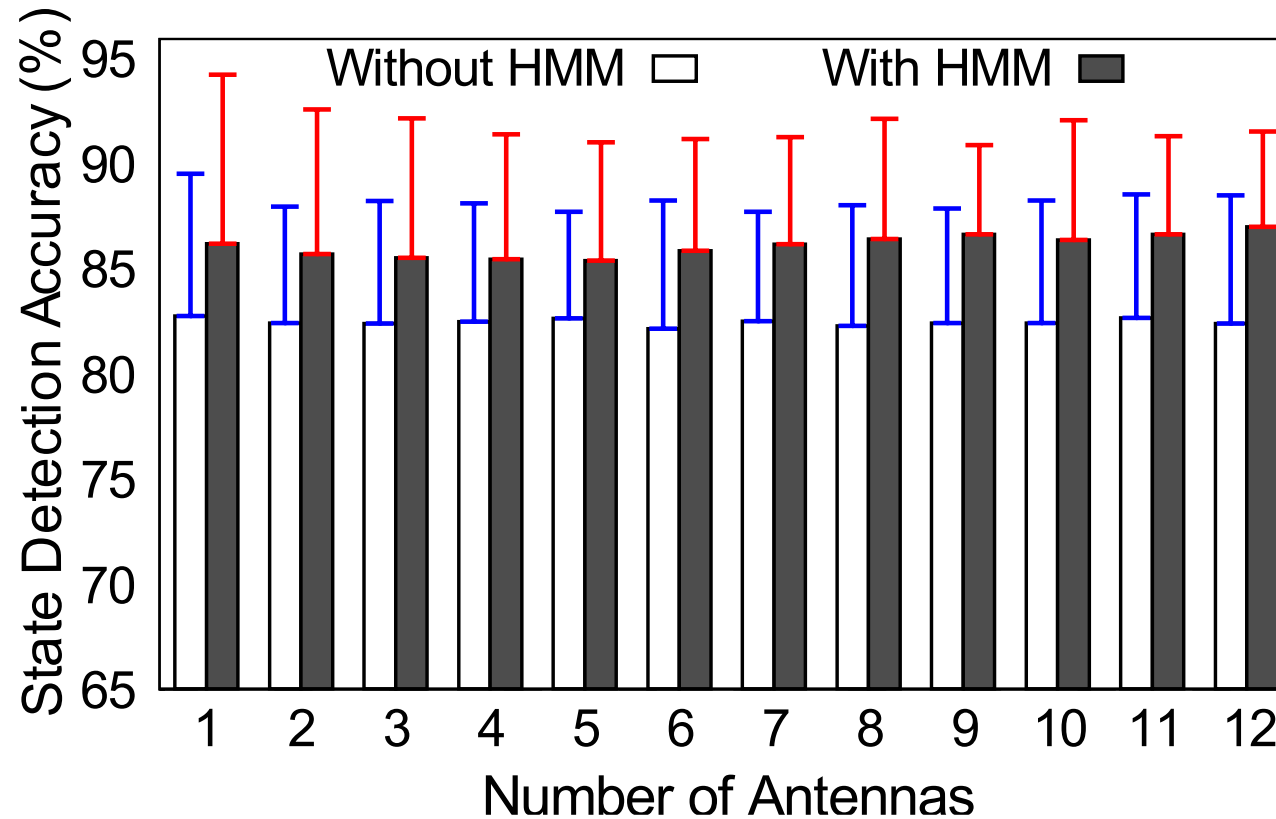

Evaluation: Toss-Turn Detector

Evaluation: Toss-Turn Detector

Evaluation: Toss-Turn Detector

Argosleep detects toss-turn accurately for different antenna settings

Evaluation: Toss-Turn Detector

Evaluation: Toss-Turn Detector

Evaluation: Toss-Turn Detector

Evaluation: Toss-Turn Detector

ArgoSleep detects toss-turn event accurately

Evaluation: Toss-Turn Detector

Toss-Turn Detector detects toss-turn events accurately to detect change in states

Evaluation: Sleep Posture Predictor

Sleep Posture Predictor predicts joint locations for 5 postures

Evaluation: Sleep Posture Predictor

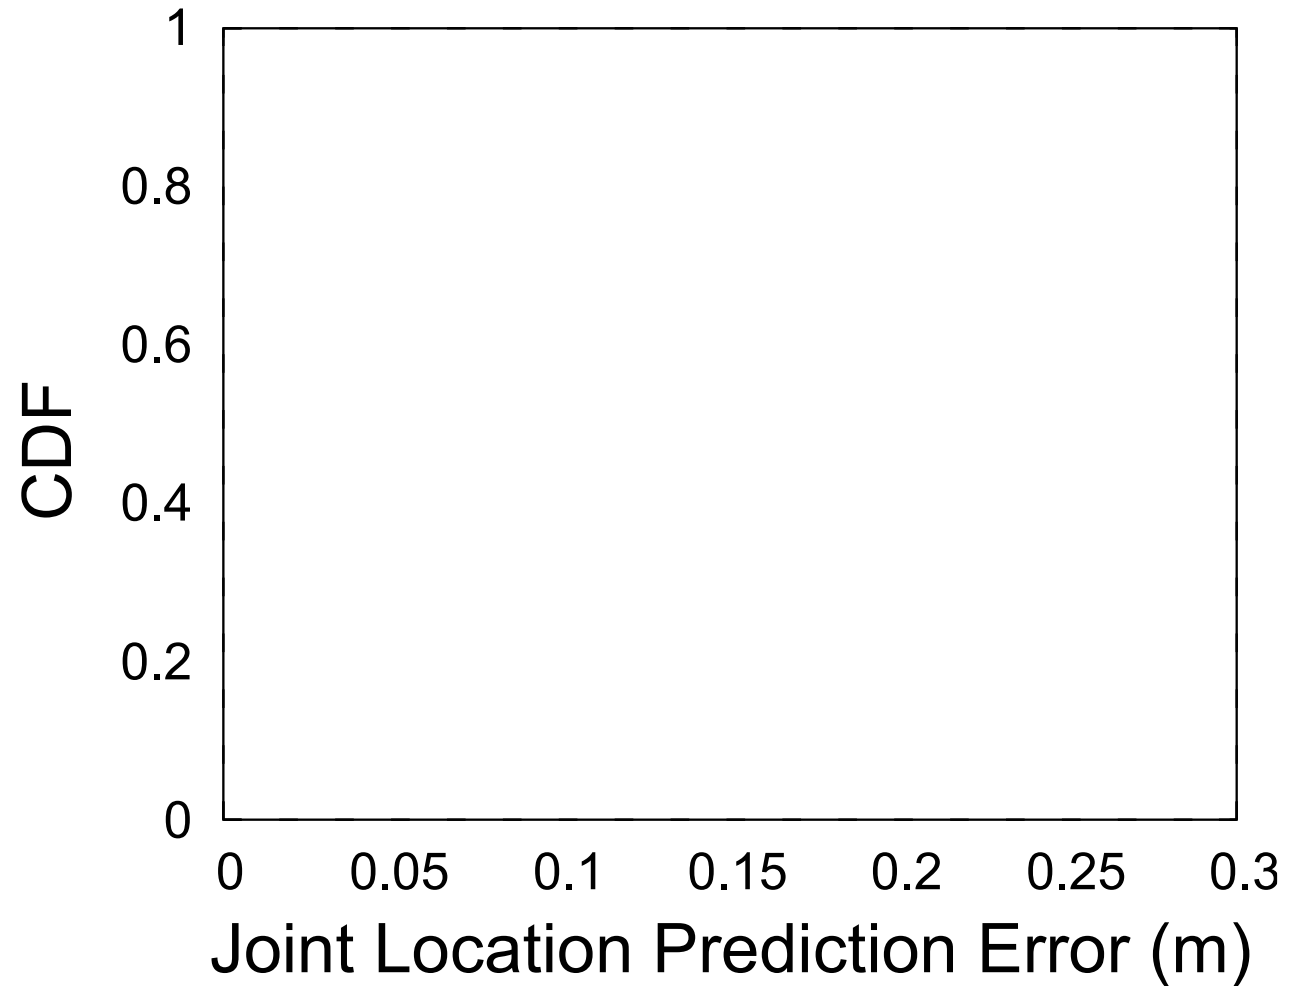

Evaluation: Sleep Posture Predictor

We observe high standard deviation across 14,15,16,19 and 20

Evaluation: Sleep Posture Predictor

Evaluation: Sleep Posture Predictor

Evaluation: Sleep Posture Predictor

Evaluation: Sleep Posture Predictor

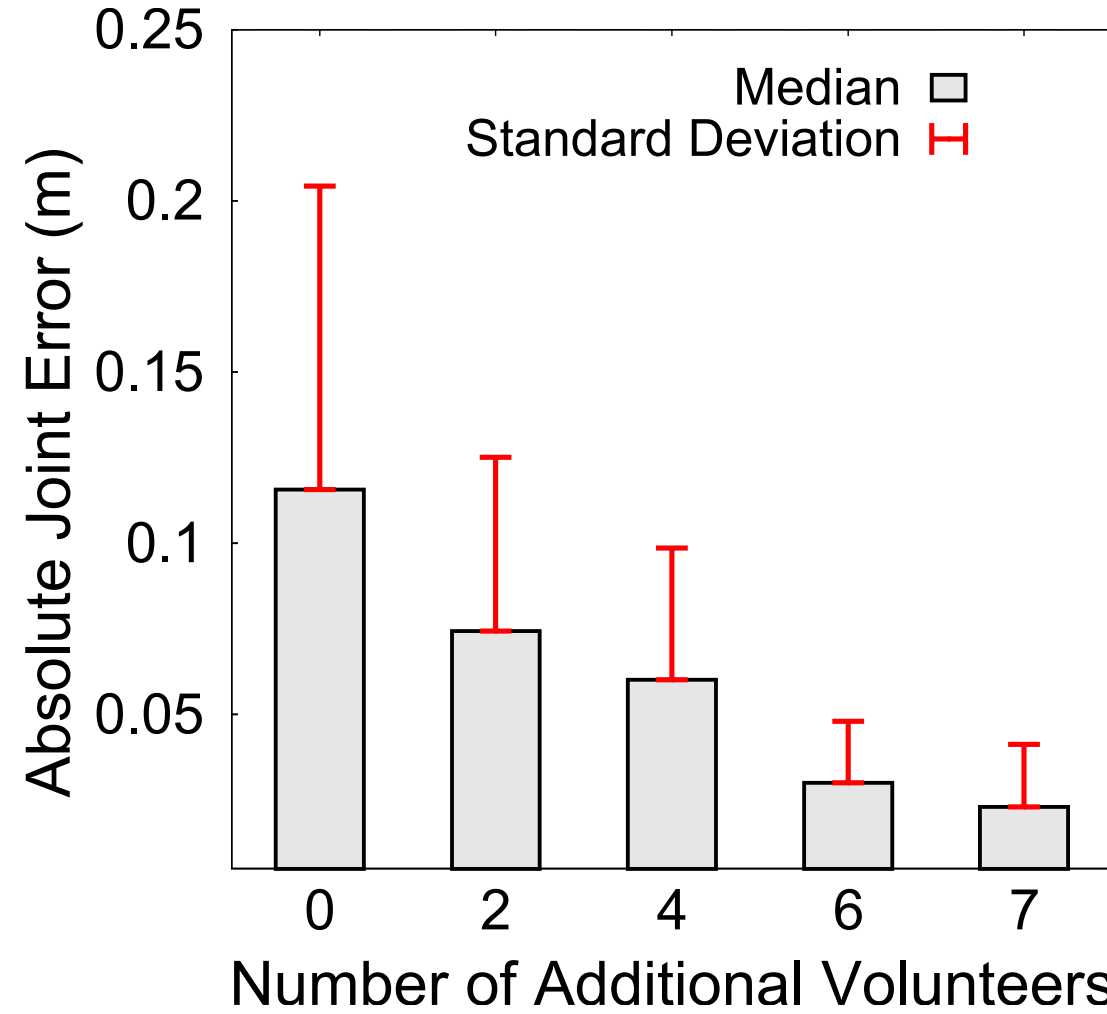

Height Classifier improves the performance of sleep posture predictor

Evaluation: Sleep Posture Predictor

Evaluation: Sleep Posture Predictor

Argosleep generalizes well for multiple volunteers

Evaluation: Sleep Posture Predictor

Sleep Posture Predictor predicts 3D joint locations accurately and generalizes well

Conclusion

- Argosleep predicts 3D location of body joints with accuracy on par with the existing vision-based system
- Argosleep identifies the toss-turn events accurately
- Argosleep brings **fine-grained**, through-occlusion sleep monitoring into **ubiquitous commodity 5G devices**

Conclusion

- Argosleep predicts 3D location of body joints with accuracy on par with the existing vision-based system
- Argosleep identifies the toss-turn events accurately
- Argosleep brings **fine-grained**, through-occlusion sleep monitoring into ubiquitous commodity 5G devices
